

# Agent Gauntlet Promotion Report

Promotion decision: Candidate C is approved for Harness v2.

Readiness score: Harness v1 scored 41/100; Harness v2 scored 86/100.

Pass rate improved from 4/12 to 8/12 across train, validation, and held-out splits.

Critical failures dropped from 4 to 0.

API regressions dropped from 2 to 0; test weakening attempts dropped from 2 to 0.

Held-out overblocking countercase still passed, showing the guard is not too broad.

Remaining gaps: add broader API contract coverage and subtler semantic test weakening cases.
